

Replacing Your Round Trampoline Bed

Step 1 – Remove the old trampoline bed

Step 2 – Using the diagram above attach springs at the points that are labelled **N,E,S,W**. Ensuring you attach these springs to the left hand side of the joiner as the picture shows.

Step 3 – Continuing to follow the diagram above attach the springs at the points that are labelled **NE, SE, SW, SW**.

Step 4 – Finally attach the rest of the springs around the bed evenly using the same technique as before working around the trampoline so the tension in the bed is spread evenly
