

Standard Trampoline Enclosure Net Instructions

This Trampoline Safety Net is specifically designed to be fitted to our Flyer range and older round Super Tramp models. Fitting it to any other make of trampoline may affect its performance, compromise its safe operation and may invalidate the warranty.

1. Remove the old enclosure net
2. Begin attaching the enclosure net by wrapping the long strap around the top cap which is located at the top of the enclosure pole. Using the D ring ensure the net is fasten tightly to the top cap.
3. Using the lace provided put the lace through one of the holes at the bottom of the net. Once laced there you can lace the enclosure net to the steel triangles on the jumping mat/trampoline bed.
4. Once the net is laced, fasten tightly to ensure your new net is fitted correctly.

Please keep these instructions in a safe place for future reference
